Mohamed Ahmed Rashed Atia

Data Analyst | Python, SQL Server, Power BI, Tableau

Alexandria, Egypt | +20 105 094 8781 | beshny2003@gmail.com | linkedin.com/in/bishnie | github.com/bshni | bshni.github.io/portfolio

PROFESSIONAL SUMMARY

Data Analyst trainee with an accounting degree from Alexandria University, currently completing the Digital Egypt Pioneers Initiative (DEPI) Round 5 data analytics program under Egypt's Ministry of Communications and Information Technology. Skilled in Python (Pandas, SciPy), SQL Server (T-SQL, stored procedures, star schema, Medallion architecture), Power BI, and Tableau. Delivered three end-to-end projects: a Python retail analytics pipeline, a SQL Server data warehouse, and linked Tableau dashboards. Combines accounting fundamentals with data-driven decision-making and C1-level English.

SKILLS

Programming & Analytics: Python, Pandas, SciPy, Matplotlib, Seaborn, SQL, Exploratory Data Analysis (EDA), Statistical Analysis, Data Cleaning, Feature Engineering, Object-Oriented Programming

BI & Visualization: Microsoft Power BI (Power Query, DAX, Data Modeling), Tableau, Data Storytelling, KPI Reporting, Dashboard Design

Databases & Data Engineering: SQL Server, T-SQL, SQL Joins, Common Table Expressions (CTEs), Stored Procedures, Views, Data Warehousing, ETL, Star Schema, Medallion Architecture, Database Design

Tools & Platforms: Git, GitHub, Jupyter Notebook, Microsoft Excel, Microsoft 365, Google Sheets

Business & AI: Accounting, Financial Reporting, Data Governance, Generative AI, Large Language Models (LLMs), Prompt Engineering

WORK EXPERIENCE

Data Analyst Trainee | Digital Egypt Pioneers Initiative (DEPI), Round 5

Ministry of Communications and Information Technology (MCIT), in partnership with Skills Dynamix | Alexandria, Egypt (Hybrid) | Jul 2026 - Present

- Selected for a national scholarship and professional training track in data analytics.
- Apply Python (Pandas) to data cleaning, exploratory data analysis (EDA), and object-oriented programming.
- Write SQL across joins, common table expressions (CTEs), stored procedures, views, and database design.
- Build interactive dashboards and data stories in Tableau and Power BI, including Power Query, data modeling, and DAX.
- Deliver six graded mini-projects across Python, SQL, Tableau, and Power BI, followed by an end-to-end capstone project with an executive presentation.

Internship Trainee | Commercial International Bank (CIB), Summer Internship Program

Alexandria, Egypt (Remote) | Sep 2024 - Nov 2024

- Completed a structured banking internship spanning five modules: banking operations, ESG, financial literacy, entrepreneurship, and digital transformation.
- Practiced professional workplace communication and active listening in data-driven business contexts.

PROJECTS

Superstore Sales & Customer Dashboards (Tableau, SQL Server) | DEPI Mini Project 3, Team of 6 | 2026

github.com/bshni/tableau_superstore_sales_customer_dashboards

- Built two linked Tableau dashboards on a SQL Server gold layer: sales, profit, and quantity KPIs with Jan-Dec trends and year-over-year % difference, plus customer counts, sales per customer, and top 10 customers by profit.
- Designed KPIs that update dynamically with Category and Sub-Category filters, using a consistent color scheme (teal for favorable, orange for unfavorable) so the dashboards read without a legend.
- Corrected inflated order counts caused by a missing Order ID in the gold layer by sourcing it from the silver layer and counting distinct orders; the distribution now reconciles to the 325 customers in the 2016 view.

SQL Data Warehouse & Business Analytics (SQL Server, T-SQL) | DEPI Mini Project 2 | 2026

github.com/bshni/sql_data_warehouse_business_analytics

- Built a retail data warehouse from a single flat file using Medallion architecture (Bronze, Silver, Gold) and a star schema with three dimensions and one fact table.
- Automated loading with a Python Excel-to-CSV script, BULK INSERT, and truncate-and-reload stored procedures for the Bronze and Silver layers.
- Implemented data quality checks per layer, a gold-layer data catalog, and a star schema diagram.
- Wrote SQL analysis scripts (change over time, cumulative, performance, part-to-whole) and customer and product KPI report views covering recency, average order value, segmentation, and customer lifespan.

Superstore Retail Analytics (Python, Pandas, SciPy) | DEPI Mini Project 1 | 2026

github.com/bshni/Mini-Project-001-Superstore-retail-analytics-project

- Built an end-to-end Python pipeline on 9,994 retail orders ($2.29M sales, $284K profit, 12.4% margin) to identify profitability, shipping, and sales drivers.
- Developed reusable, chainable object-oriented cleaning and feature-engineering classes with custom exception handling, IQR outlier detection, and engineered fields such as Profit Margin and Discount Bucket.
- Found a significant negative correlation between discount and profit (r = -0.22) and traced most losses to Tables, Bookcases, and Supplies, supporting a pricing recommendation.
- Delivered 11 Matplotlib/Seaborn visualizations, a dashboard, and an automated KPI report built with a custom report-generator class.

EDUCATION

Bachelor's Degree in Accounting | Alexandria University, Faculty of Commerce

Alexandria, Egypt | 2022 - 2026 | GPA 3.409 (A-)

CERTIFICATIONS

- IBM Data Fundamentals, IBM SkillsBuild | Aug 2026
- Associate Data Engineer in SQL, DataCamp | Jan 2026
- AI Fundamentals Certificate, DataCamp | Dec 2025
- Data Literacy Certificate, DataCamp | Aug 2025
- McKinsey Forward Program, McKinsey & Company | Dec 2024

Additional Training: Zoho Books (Udemy), Ubuntu Linux Essentials (MaharaTech/ITI), ICDL (Edraak), HSBC Job Simulation (Forage), AI for Everyone (MaharaTech/ITI), Financial Literacy for Youth (Egyptian Banking Institute), Data Literacy in Practice (SAS), Digital Literacy & Productivity (LinkedIn Learning), Sales Fundamentals (Udemy).
